SUMMARY

Dedicated third-year Software Engineering undergraduate at the University of Kelaniya. Specialized in Web and Mobile development, DevOps, and Networking. Actively seeking opportunities to apply technical expertise in full-stack development and professional growth.

EDUCATION

BSc (Hons) Software Engineering

University of Kelaniya

2023 – Present

Colombo, Sri Lanka

- Specializing in **Net-Centric Web Application Development**, **Health Informatics**, and **Mobile Computing**

GCE Advanced Level

H/Walasmulla National School

2019 – 2023

Walasmulla, Sri Lanka

- 3B Passes** in Mathematics, Chemistry, and Physics (Z-Score: 1.52)

PROJECTS

Nestora E-Commerce | Individual Project(Ongoing)

MERN Stack, Redux, Stripe, Cloudinary

[GitHub](#)

- Engineered a scalable full-stack furniture marketplace with secure JWT authentication and a responsive UI design.
- Managed complex application-wide state using Redux to ensure a seamless frontend dataflow during product discovery and cart updates.
- Integrated Stripe API for secure payment processing and leveraged Cloudinary cloud storage for optimized media asset management.
- Implemented optimized RESTful APIs and product search algorithms to deliver a low-latency shopping experience across desktop and mobile devices.

ReserveX | Group Project

Spring Boot, React, MySQL

[GitHub](#)

- Developed a dual-portal booking and reservation system featuring live, interactive grid-based layout maps.
- Built automated backend pipelines utilizing Spring Boot to generate secure, transactional QR code receipts for user check-ins.
- Designed and optimized a relational MySQL database schema to handle concurrent booking states and prevent double-reservations.
- Maintained a modular architecture separating customer-facing interfaces from administrative management dashboards.

Readify | Group Project

PHP, MySQL, HTML, CSS, JavaScript

[GitHub](#)

- Architected a fully responsive digital bookstore application utilizing a native PHP backend paired with a relational MySQL database.

- Implemented secure user authentication, cookie-based session management, and server-side validation to protect user data and transactions.
- Developed dynamic front-end functionality including instant search filters and interactive cart elements using clean, vanilla JavaScript.
- Designed an optimized MySQL schema to store, query, and manage complex relational data for digital books, user profiles, and order histories.

TECHNICAL SKILLS

Languages : Java, JavaScript, Python, PHP, SQL, HTML, CSS

Full-Stack : MERN Stack, Next.js, PHP

Frontend/UI : React.js, Next.js, Redux, Tailwind CSS

Tools/DevOps : Cisco Packet Tracer, PostgreSQL, MySQL

LEADERSHIP ACHIEVEMENTS

Head Of Editing - Software Engineering Student’s Association 2025 – Present
University of Kelaniya

Digital Marketing Lead - Project e-waste 2025 – 2026
Electronic Development and Innovation Center (EDIC)

CERTIFICATIONS

2nd Runner-Up (Hackathon) – **Junior Hack 7.0**, University of Kelaniya

LANGUAGES

English : Professional Proficiency

Sinhala : Native Proficiency
