

HANSI THARAKI RANDIMA

SOFTWARE ENGINEERING UNDERGRADUATE

Kelaniya, Sri Lanka | +94 71 480 9039 | tharaki115h@gmail.com
[GitHub](#) | [LinkedIn](#) | [Medium](#) | [Portfolio](#)

SUMMARY

Dedicated third-year Software Engineering undergraduate at the University of Kelaniya with a strong foundation in **full-stack web and mobile application development**, **object-oriented programming**, **database management**, and software engineering principles. Experienced in building projects using the **MERN stack**, **Spring Boot**, **Flutter**, and **.NET**, with knowledge of **RESTful APIs**, version control using **Git**, and **Agile development** practices. A quick learner and collaborative team player seeking a software engineering internship or graduate opportunity to apply technical knowledge, solve real-world problems, and contribute to innovative software solutions while growing as a professional developer.

EDUCATION

University of Kelaniya

2023 – Present

BSc (Hons) Software Engineering | Kelaniya, Sri Lanka

- Specializing in **Net-Centric Web Application Development**, **Health Informatics**, and **Mobile Computing**

PROJECTS

Nestora E-Commerce | Individual Project

Technologies: MERN Stack, Redux, Stripe, Cloudinary | [GitHub](#)

- Engineered a production-ready **luxury furniture e-commerce platform** featuring a curated product collection, advanced filtering, and a comprehensive admin panel.
- Managed complex application-wide state using **Redux Toolkit** to ensure seamless **dual-cart synchronization** (guest and authenticated).
- Integrated **Stripe Checkout** for secure payment processing and leveraged **Cloudinary** for optimized media asset management.
- Developed a robust **Node.js/Express** backend with **JWT authentication** and **Resend API** for automated email notifications.

IssuePilot | Individual Project (Ongoing)

Technologies: Spring Boot, PostgreSQL, Redis, Next.js, WebSockets, Docker | [GitHub](#)

- Building a full-stack **Jira-style issue tracker** from scratch, featuring a domain-driven **Spring Boot** backend and a **Next.js/TypeScript** frontend, fully containerized with **Docker Compose**.
- Designed a **PostgreSQL** data layer with version-controlled **Flyway migrations** and database-level constraints, ensuring data integrity across issues, projects, and users.
- Developed a **RESTful CRUD API** for issue management with global exception handling and structured request/response DTOs.
- Extending the system with a **Kanban board view**, **event-sourced audit logging**, real-time **WebSockets** updates, and a **Redis**-backed async job queue.

ReserveX | Group Project

Technologies: Spring Boot, React, MySQL | [GitHub](#)

- Developed ReserveX, a **dual-portal booking system** for the Colombo International Book Fair, featuring live, interactive **grid-based layout maps** for vendor stall selection.
- Implemented **JWT-secured role-based access control** (Vendor vs. Admin) to manage stall availability and oversee booking statistics via a live dashboard.
- Built automated **Spring Boot** backend pipelines to send instant confirmation emails with secure **QR code receipts** for user check-ins.
- Designed and optimized a relational **MySQL** database schema to handle concurrent booking states and prevent double-reservations.

Readify | Group Project

Technologies: PHP, MySQL, HTML, CSS, JavaScript | [GitHub](#)

- Architected a fully responsive digital bookstore application utilizing a native **PHP backend** paired with a relational **MySQL database**.
- Implemented secure user authentication, **cookie-based session management**, and server-side validation to protect user data and transactions.
- Developed dynamic front-end functionality including instant search filters and interactive cart elements using clean, **vanilla JavaScript**.
- Designed an optimized **MySQL schema** to store, query, and manage complex relational data for digital books, user profiles, and order histories.

TECHNICAL SKILLS

- Languages: Java, JavaScript, Python, PHP, SQL, HTML, CSS
- Full-Stack: MERN Stack, Next.js, PHP, SpringBoot
- Frontend/UI: React.js, Next.js, Redux, Tailwind CSS
- Tools/DevOps: MongoDB, Docker, PostgreSQL, MySQL

LEADERSHIP & ACHIEVEMENTS

Head Of Editing – Software Engineering Student's Association University Of Kelaniya	2025 – 2026
Digital Marketing Lead - Project e-waste Electronic Development and Innovation Center (EDIC)	2025 – 2026

CERTIFICATIONS

- **2nd Runner-Up** (Hackathon) – **Junior Hack 7.0**, University of Kelaniya

LANGUAGES

- **English:** Professional Proficiency
- **Sinhala:** Native Proficiency
